

Royal Game of Ur

You will need 14 coins or tokens (7 per player) and 3 extra coins to toss.

For example:

Player 1 = 7 pennies

Player 2 = 7 nickels

Tossing coins = 3 quarters

How To Play

Each player takes their coins and player 1 tosses the quarters to move.

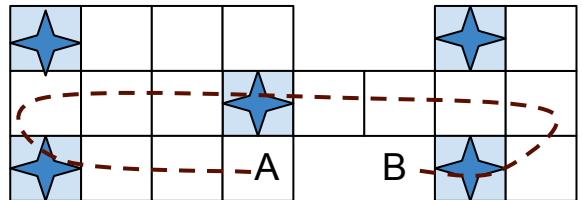

1 Head = Move 1 space

2 Heads = Move 2 spaces

3 Heads = Move 3 spaces

3 Tails = Move 4 spaces

Player 1 starts by entering through the square with the letter 'A' and follow the path off the board to letter 'B'

Player 2 has a similar path on their side.

If you land a square occupied by the other player's piece, the opponent's piece is knocked off the board and must start over.

If you land on a marked square, your piece is safe from being knocked off.

If you land a marked square, you can roll/toss again. You don't necessarily have to move that piece.

Once you made your way around the path, you must roll/toss the exact value to leave the board.

The first player to move all 7 of their coins off the board wins.
